

Assignment 1

Project Setup

Anna's Kitchen Website Project

Project scenario

Anna's Kitchen, a local restaurant, has commissioned your development team to build a new website. As the first task on the project, your project manager has assigned you the responsibility of setting up the website so that development can begin. Before any content or styling can be added, the project requires a correctly configured HTML document and an associated stylesheet.

Your task

Create the initial project structure shown below, then add the document metadata and introductory restaurant content.

```
annas-kitchen/  
├── images  
├── video  
├── index.html  
└── styles.css
```

1. Create the project files

- Create a project folder named **annas-kitchen**.
- Create two sub folders **images** and **video**
- Create **index.html** in the root of the project folder.
- Create **styles.css** in the root of the project folder.
- Leave **styles.css** empty at this stage; visual styling will be added a later.

2. Configure the HTML document

- Use the HTML5 document type declaration.
- Create the html, head and body elements.
- Set the document language to English using lang="en".
- Declare UTF-8 character encoding.
- Add responsive viewport metadata using width=device-width and initial-scale=1.0.
- Add the description: **Anna's Kitchen serves freshly prepared British food.**
- Set the document title to **Anna's Kitchen**.
- Link the document to the styles.css stylesheet.

3. Add the initial page content to the body

- Add a level-one heading containing **Anna's Kitchen**.
- Below the heading, add the restaurant introductory sentence: **Freshly prepared British food in a warm and welcoming setting.**
- Add a level-two heading containing **Welcome**.
- Add the four supplied welcome paragraphs below.

Here at Anna's Kitchen, we prepare fresh, home-cooked meals every day using quality ingredients, and we do everything we can to make our guests feel at home from the moment they walk through the door.

Whether you're stopping by for a hearty breakfast, a relaxed lunch with friends, or a family dinner, we're passionate about serving delicious food in a warm and welcoming atmosphere. From our traditional favorites to our seasonal specials, everything is prepared with care by our team.

We're proud to be part of the local community and love welcoming both familiar faces and first-time visitors through our doors.

Thank you for taking the time to visit Anna's Kitchen. We hope to welcome you soon and share our passion for great food and friendly service with you.

Expected result

When index.html is opened in a browser, the page should display the restaurant name, introductory sentence, Welcome heading and four Welcome paragraphs using the browser's default presentation. The browser tab should display Anna's Kitchen.

Assessment criteria

- ☐ The project contains index.html and styles.css.
- ☐ The HTML document uses an HTML5 doctype and lang="en".
- ☐ The head contains the required character encoding, viewport, description, title and stylesheet link.
- ☐ The body contains one h1, one h2, the introductory sentence and all four Welcome paragraphs.
- ☐ The stylesheet link points to styles.css in the same folder.
- ☐ The HTML document opens without missing-file errors.
- ☐ The HTML and CSS filenames exactly match the specification.
