

Assignment 3

Add Media and Semantic Structure

Anna's Kitchen Website Project

Project scenario

The website is beginning to take shape. Anna's Kitchen has supplied an introductory video, a restaurant image and an illustrated location map. The client has also requested clear navigation and a more meaningful document structure.

Your task

Reorganize the existing page using semantic HTML, add the supplied media, complete the remaining page content and provide navigation between the main sections. Do not add the final visual design or multi-column layout yet.

```
annas-kitchen/  
├── index.html  
├── styles.css  
├── images/  
│   ├── annas.jpeg  
│   └── map.png  
└── video/  
    └── Annas Kitchen Intro.mp4
```

1. Create the page regions

- Create one header element at the beginning of the body.
- Move the restaurant name and introductory sentence into the header.
- Create a nav element inside the header.
- Create one main element containing the primary page content.
- Place each major content area in its own section element.
- Create one footer element after main.
- Use a logical heading hierarchy with one h1 element and an h2 element for each main section.

2. Add the navigation

- Give the nav element the accessible label Main navigation.
- Add an unordered list containing the following four links:
 - Home
 - Menu
 - Bookings
 - Visit Us
- Connect each link to the matching section using a fragment identifier:

- Home links to #welcome
- Menu links to #menu
- Bookings links to #bookings
- Visit Us links to #visit

3. Organise the sections

Create the following sections inside the **main** element.

Welcome

- Create a section with the identifier **welcome**.
- Move the existing Welcome heading and four Welcome paragraphs into this section.

Our Menu

- Create a section with the identifier **menu**.
- Move the existing **Our Menu** heading, menu introduction and complete table into this section.

Book a Table

- Create a section with the identifier **bookings**.
- Move the existing **Book a Table** heading and complete booking form into this section.

Visit Anna's Kitchen

- Create a section with the identifier **visit**.
- Add the heading: **Visit Anna's Kitchen**
- Add the following paragraph:

Step inside Anna's Kitchen and enjoy a warm, welcoming atmosphere designed for families, friends and anyone looking for freshly prepared, home-cooked food. Our comfortable dining area provides the perfect setting to relax and enjoy breakfast, lunch or dinner while experiencing the friendly service that makes every visit special.

Find Us

- Create a section with the identifier **location**.
- Add the heading: **Find Us**
- Add the following paragraph:

Anna's Kitchen is conveniently located in the heart of the local community, making it easy to visit whether you're arriving by car, public transport or on foot. Use the map below to help plan your journey. We look forward to welcoming you and serving you freshly prepared, home-cooked meals in a warm and friendly atmosphere.

4. Add the introductory video

- Place the video in the Welcome section after the four introductory paragraphs.
- Use the video element.
- Enable the browser's playback controls.
- Set the displayed width to 100%.
 - Add a source element that references: **video/Annas Kitchen Intro.mp4**

- Declare the media type as: **video/mp4**
- Include fallback text stating: **Your browser does not support HTML video.**

5. Add the restaurant image

- Place the image inside a figure element in the **Visit Anna's Kitchen** section.
- Reference the following image: **images/annas.jpeg**
- Set the intrinsic dimensions to:
 - width="1200"
 - height="700"
- Use the following alternative text: **Illustration of the warm dining room at Anna's Kitchen**
- Add a figcaption element containing: **The dining area at Anna's Kitchen**

6. Add the location map

- Place the illustrated map in the Find Us section.
- Reference the following image: **images/map.png**
- Set the intrinsic dimensions to:
 - width="1200"
 - height="700"
- Use the following alternative text: **Map showing the location of Anna's Kitchen**

7. Add the footer

- Add a paragraph inside the footer.
- Use the following text: © **Anna's Kitchen**

Expected result

The page should now contain all final HTML content and use meaningful page regions. Navigation links should move to the corresponding sections. The video, restaurant image and map should load from their project folders. The page may still use mostly default browser styling.

Acceptance criteria

- ☐ The page contains one header, one main and one footer.
- ☐ Each main content area is placed inside a section with the specified id.
- ☐ The navigation contains four working fragment links.
- ☐ The existing menu table and booking form remain complete and functional.
- ☐ The introductory MP4 video loads and displays browser controls.
- ☐ The restaurant image is inside a figure with a figcaption.
- ☐ Both images have meaningful alternative text and explicit dimensions.
- ☐ The heading hierarchy is logical and contains only one h1.
- ☐ All file paths match the required folder structure.

Supplied files

- images/annas.jpeg
- images/map.png
- video/Annas Kitchen Intro.mp4
- Model solution and completed project files for comparison
